## List of Figures

# 1 Item Sales Trends or Sales Distracts

## 1.1 Introduction

This report explores the buying trends of WW1's customers by year. The data is presented in two different dashboards. The first data board is the item Sales Dashboard, this looks at most bought items, the amount of items by region, along side profit per item and the total dollar revenue amount sold for an item. The Last 3 diagrams only look at the top ten items for either respective view. The second data board is the item Purchased Dashboard this looks at the quantity of an items bought in a year, For further Drill downs of each of these metrics refer to the dashboard in power BI for a closer look at each item.
